### **Other useful information**

The University of Tetova is well organized HEI in terms of all requirements concerning staff and student mobility with other HEI from the region and wider. This due to its previous involvement with other universities. We have more than sufficient operational capacity as well as human resources and infrastructure to be able to cope with all requirements of a project of this scale. Although newly moved to the new buildings, all faculties all well set and well equipped to be able to develop any activity foreseen within the frame of the PENTA Join SEE project.

We hope to give our best and to make this undertaking as successful as possible which will help our University to get better integrated into the EU educational and scientific values, making it comply with all counterparts in the region and wider.
