Student-oriented and research - oriented institution with a fundamental responsibility for the social and cultural development of individuals in preparing their future roles in society.

- > prepare students for their professions, and academic training for scientific work
- > through research it contributes to the expansion of knowledge to society particularly via development and implementation of new scientific achievements and technologies.

- > Open and internationally-oriented (mostly Europe-oriented) institution
- > Combining the role of developing as an open and tolerant European university with preserving and developing Croatian cultural identity, since it is the only Croatian speaking University in BiH

University of Mostar – Founders

Founders of the University of Mostar are the cantons with the Croatian majority in Federation of BiH:

- Herzegovina-Neretva,
- West-Herzegovina,

MASTER STUDY

**1-2 YEARS
60-120 ECTS**

Master

**UNDERGRADUATE
STUDY**

**3-4 YEARS
180-240 ECTS**

Bachelor

University of Mostar

International Relations

- The University of Mostar has interuniversity cooperation with all Universities in BiH through the Rector's conference of BiH, with the Universities in the Republic of Croatia, because it is also a member of the Rector's Conference of the Republic of Croatia. Furthermore the University is involved in the network of the interuniversity cooperation with Universities in Italy and Danube region.
- The University has actively participated in different international projects, mostly TEMPUS projects, we also participate in four new TEMUS projects which are in the initiating phase at the moment.

University of Mostar

- The University has a complete control and possibility of governing only with a part of international relations which functions at the University level.
- Main reasons for that are significant problems and difficulties, starting from the fact that there is no function of vice-rector exclusively for international relations (there is a function of vice-rector for science and international relations), that the International relations office at the University level has only two persons, that there is no administrative support for activities of the international relations (realization of student, teacher and associate mobility), that there is no adequate technical support to the activities of international relations, etc.

University of Mostar

Mobility schemes

- One student from Germany (University of Marburg) stayed for a semester at the University of Mostar in the framework of Tempus project.
- As a reciprocity our student visited University of Marburg.
- Faculty of Civil Engineering has agreements with the Faculties of Civil Engineering from Republic of Croatia
- The same case is at the Faculty of Medicine
- Quite long tradition of one month long study visits funded by WUS Austria or Austrian Ministry of Education. This activity is done by teachers, associates and students of the Faculty of Economics and Faculty of Mechanical Engineering and Computing.

University of Mostar

Mobility schemes

- Using different scholarships given by embassies and foundations of some countries teachers and associates stayed in Japan, United States (Faculty of Economics, Law and Civil Engineering).
- By signing agreements on cooperation with other Universities, the University of Mostar makes prerequisites for systematic structuring of mobility.
